

Basque Nomads' sustainability policy

Updated on 2/Nov/2020

As Basque Nomads our mission is to contribute to sustainable development from our business, to meet present needs without compromising those of future generations.

Our practices as a company are aimed at maximising positive impacts for us and society, minimising eventual negative impacts throughout our entire value chain.

We are committed to promoting best practices in sustainability and periodically reviewing our performance based on our interests, our clients and society in general. In this sense, we commit to:

- Manage the risks and opportunities of our activities, with the aim of preventing damage to people, property and the environment.
- Contribute to the reduction of greenhouse gas emissions in our tours and guided visits through concrete actions in our tours and with our suppliers.
- Ensure compliance with current legal requirements, as well as those others that we subscribe to.
- Transfer our culture of sustainability to our clients, product and service providers and other stakeholders in society.
- Collaborate as far as possible and with our time and resources to projects within the historic territory of Gipuzkoa that promote sustainable development.
- Encourage the search for sustainable businesses and a circular economy, promoting the creation of social value, establishing alliances and collaborations with other stakeholders.
